
Groundswell NZ

We are a grassroots farmer movement spreading throughout NZ and are looking for contacts/coordinators in each region.

We have put a stake in the ground against unworkable, cost prohibitive environmental regulations and unjustified taking of land.

We are calling for one strong united voice advocating for farmers and rural communities. That voice needs to advocate for Farmers to the Government, not the Government to Farmers.

We have a range of actions planned over the next few months. First up, is for all farmers to not allow any council surveys of natural areas on their land until issues like the miss-use of private property information are resolved.

The more farmers support the Groundswell, the more likely we are to get positive changes to the regulations.
