BVD ADD-ON	$7/sample add-on ONLY	The BVD test is only available for animals sampled with Tissue Sampling Units (TSU). **The BVD test can only be ordered as an add-on**. Available for use in **all ages**. For calves <35 days of age a PCR test available through your veterinarian may be preferred. Speak with your veterinarian if you would like to discuss this option. Not suitable for use as part of an animal export protocol.		

NOTES:

- All prices excluding GST. Prices correct as of October 1, 2024.
- Zoetis' preferred sample type is tissue samples taken using standard Allflex TSU vials. Available from Zoetis ($3.70 + GST per unit) or alternative supplier.
- Hair samples in Zoetis hair cards (available FREE from Zoetis) and straws of Semen can also be used for testing at **no additional cost to process**.
- Testing usually takes 4-6 weeks from arrival at our Auckland office to complete based on a complete and correct order form confirmed by test owner.
- *Single genetic conditions may be ordered stand-alone for $25/sample
